

# The Ultimate Midjourney Guide

This Ultimate Midjourney guide is created to teach you all you need to know from beginner to advanced levels so you can use Midjourney to level up your life.

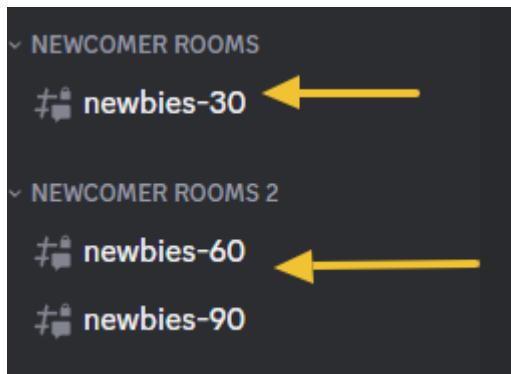

- **How to get started with Midjourney?**

Here is how:

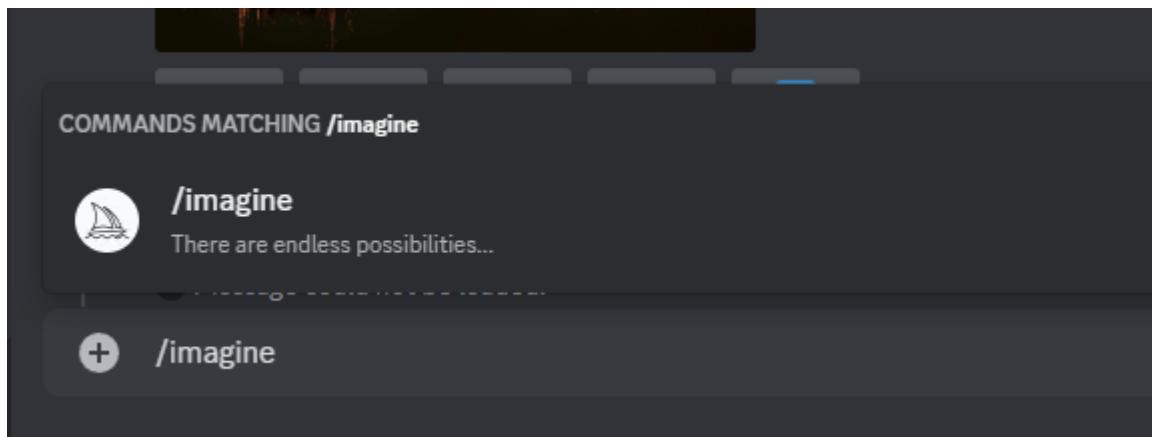

Install Discord (or access it from the web), and join the <https://discord.gg/midjourney>.

Joining is free for everyone.

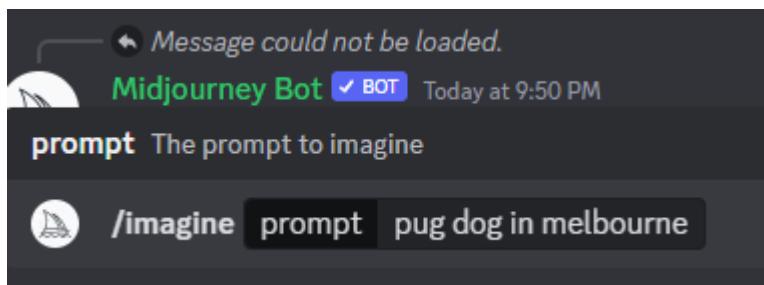

1. Go to any of these rooms.

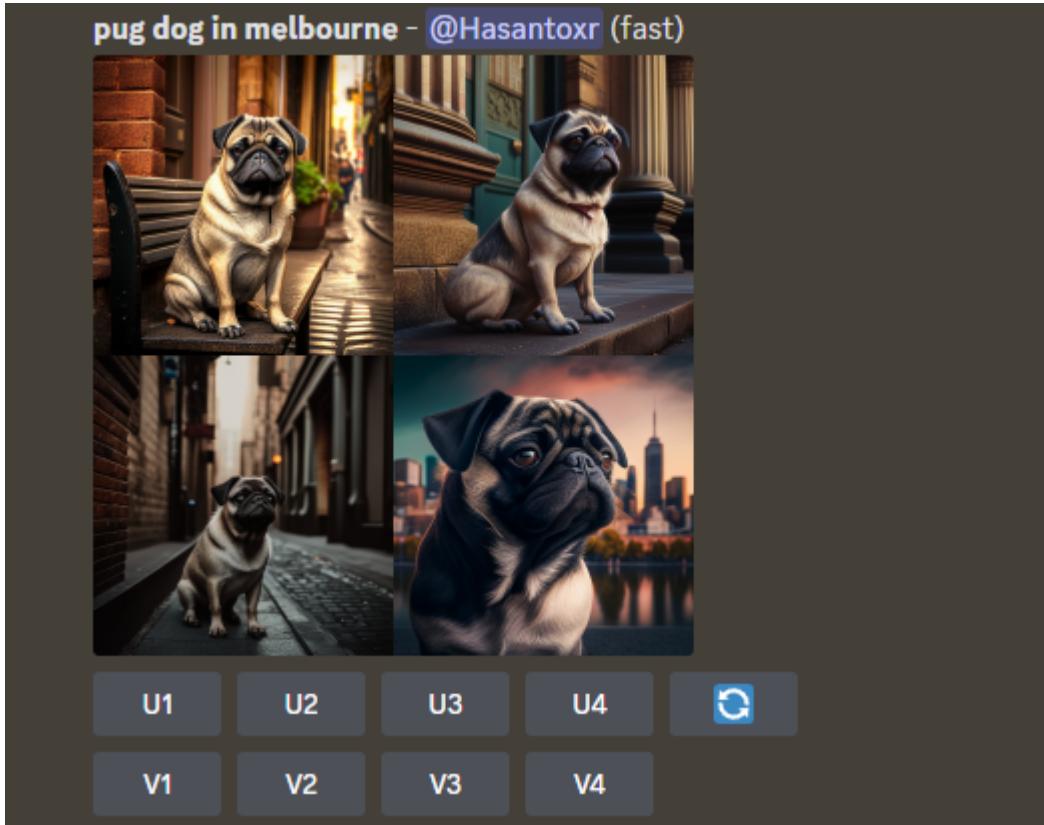

2. Type /imagine and then whatever you want.

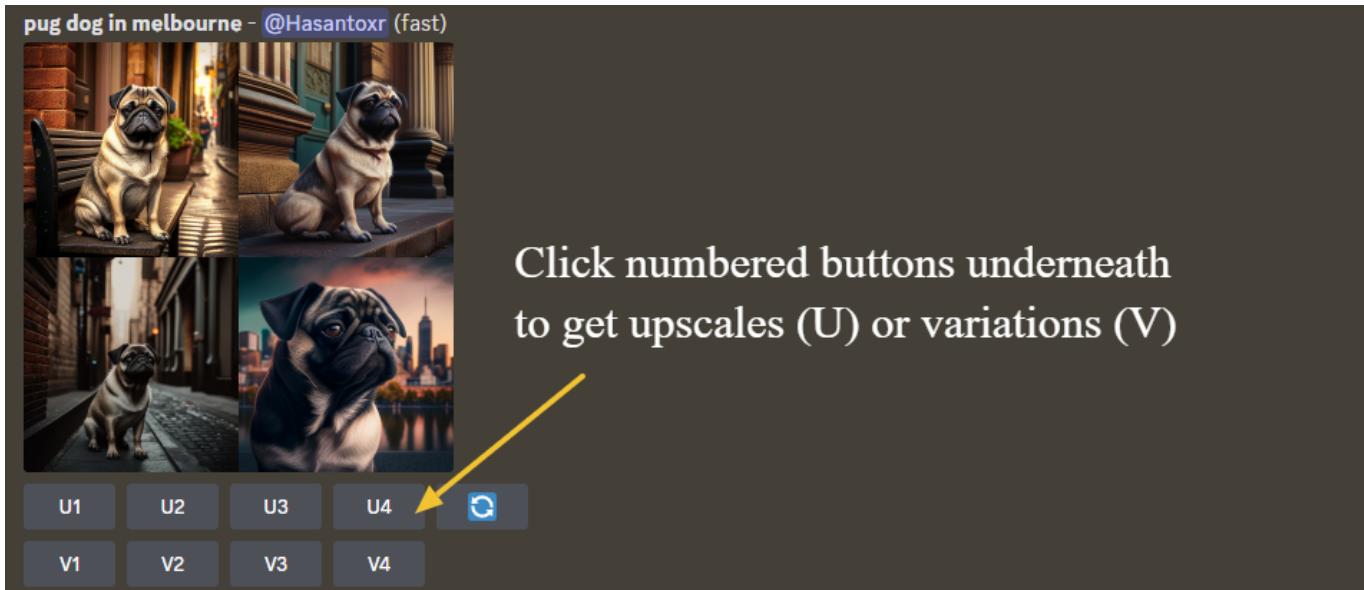

3. The bot will send you 4 images in 60 seconds.

Here are the images because I typed [pug dog in melbourne](#) see image below:

4. Click numbered buttons underneath to get upscales in high resolution (**U**) or variations (**V**).

- **Some Basics For Beginners.**

If you want to create images like these in less than 10 seconds then you must read this.  
You can create following things with Midjourney:

1. Logos
2. Social Media Posts
3. Marketing Advertisements & YouTube Thumbnails etc.

## Few Tips For Beginners

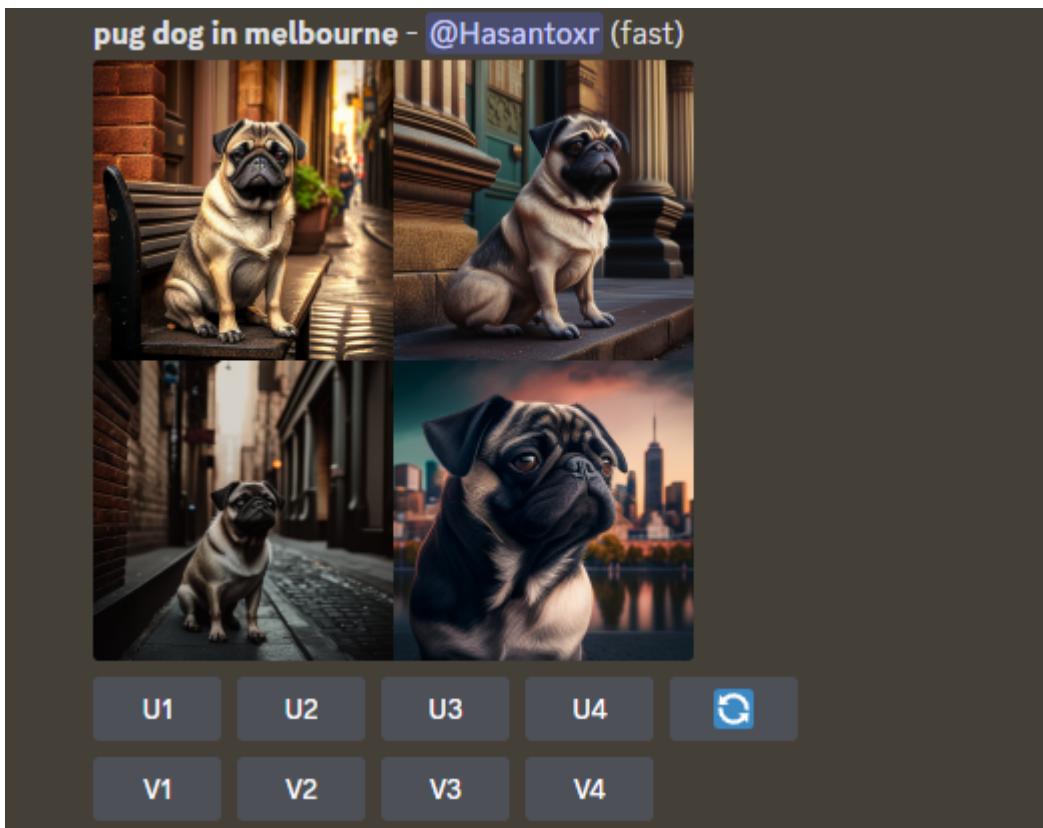

### 1. Imagine

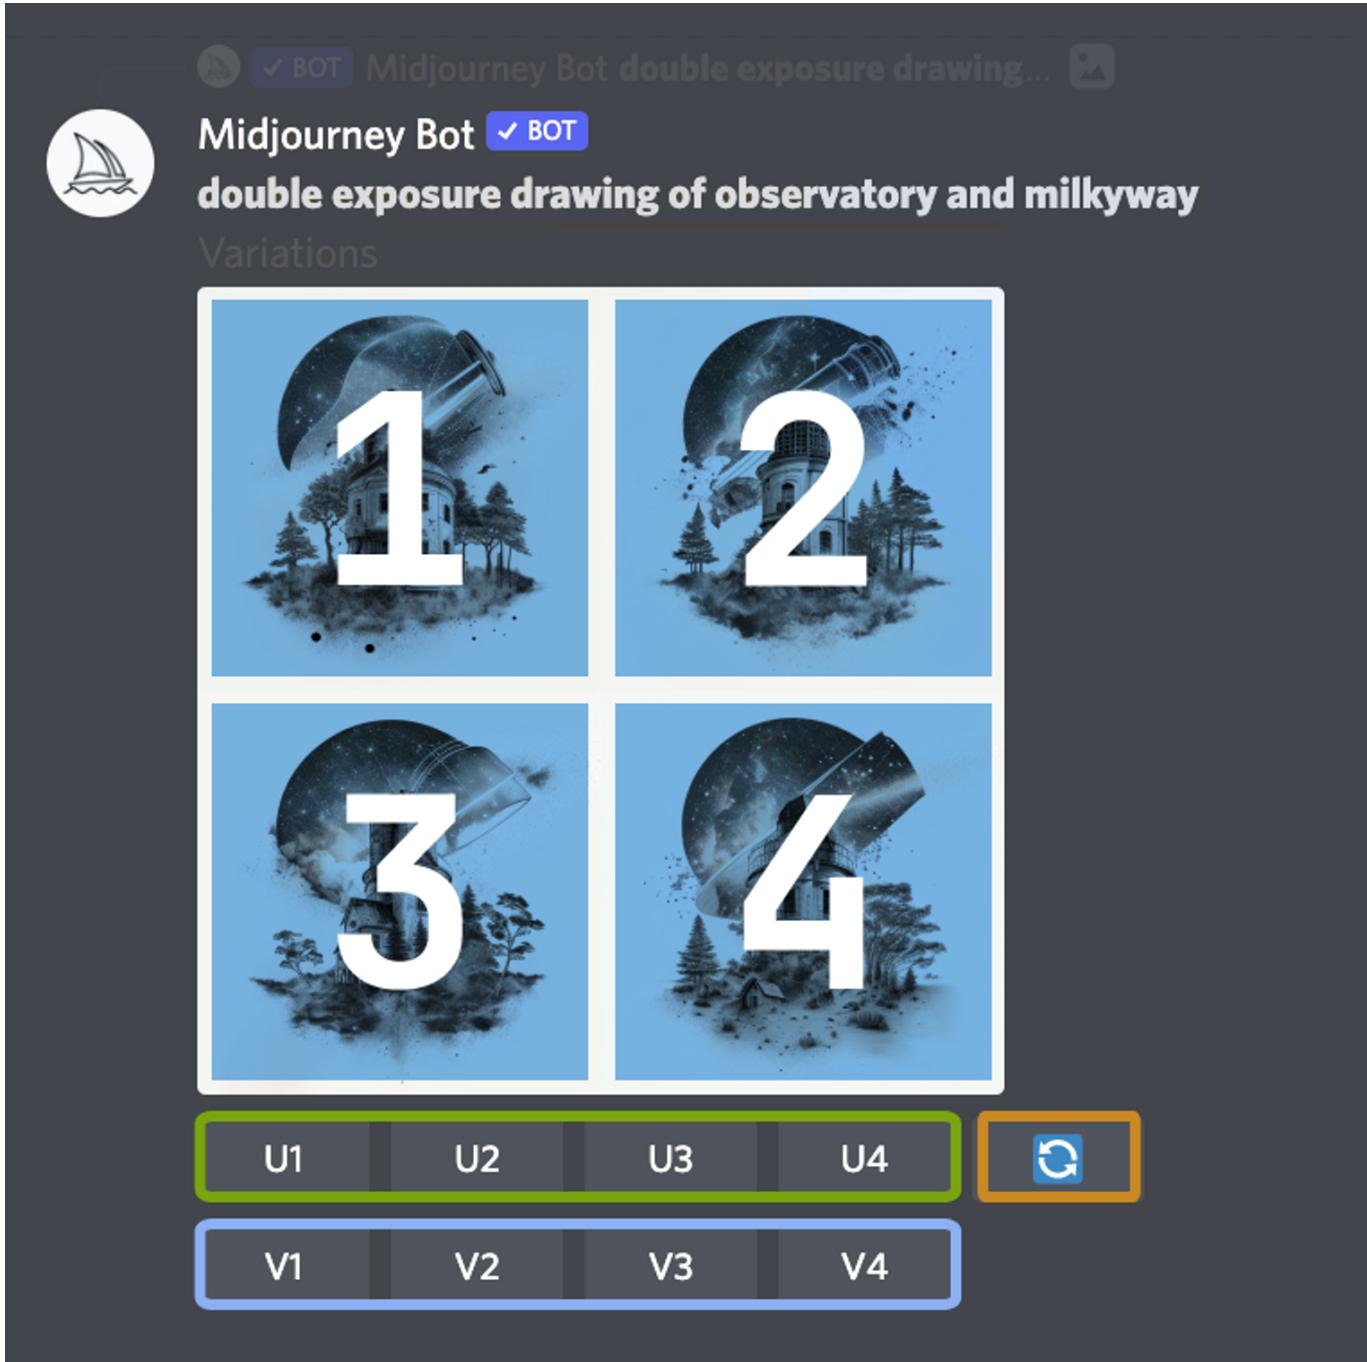

Type `/imagine` and then type whatever you want inside the Discord group. A prompt area will appear where you can provide the image description. After that just **Enter**.

### 2. Be more clear while typing

The more specific your description can be, the better the AI will be able to deliver accurate results. Be specific and, if you have a particular type in mind, describe it in your description.

### 3. Redo ↺

4. Use will see a bluish refresh button on the right side, you can use that to request a new set of 4 images.

- **How to use your own image as a source for Midjourney?**

Want to use your own images and modify them using Midjourney? It's often called img2img:

1. Upload a photo to discord
2. Once it's available, open it in the browser and copy the image URL
3. Paste the image URL at the beginning of the '/imagine' prompt and add your description.

- **How to merge a few existing images into one?**

- **How to use a consistent character across multiple images?**

- **How to ask Midjourney to slightly modify an existing image.**

Sometimes you want to maintain an image that was just created, with a slight modification.

To enable that option - go to /settings and turn on the 'mix mode' option.

From now on, every time you will select a certain version, Discord will open a popup and let you modify that version's prompt before submitting. This is an extremely useful option
